Safety Information

Read this entire manual carefully before you start using the device. This will take you a couple of minutes, but it will save you time later and will allow you to enjoy all the features on your device.

THIS MODEL MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg and the highest SAR value for this device when tested at the ear was 0.477 W/kg*. As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this user guide**. In this case, the highest tested SAR value is 1.079 W/kg*.

As SAR is measured utilizing the devices highest transmitting power the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a 'hands-free' device to keep the mobile phone away from the head and body.

Additional Information can be found on the website of the World Health Organization

**The tests are carried out in accordance with international guidelines for testing.*

***For body worn operation, this phone has been tested and meets the RF exposure guidelines when used with the (manufacturer name) accessories supplied or designated for this product. Use of other accessories may not ensure compliance with RF exposure guidelines*

How to handle and preserve your device

- Trying to modify, disassemble or repair the device or the charger yourself will make the warranty invalid.
- Avoid **hitting or shaking your phone.**
- The warranty of this phone may be annulled if you use unauthorised accessories. To prevent this from happening and to keep your phone working properly use only the battery charger and Micro USB cable that **originally comes with the device.**

- Make sure the device does not get wet. To avoid possible, short-circuit, electric shock or corrosion keep your phone away from rain, water splash, sweat or moisture. You must not use your device with your hands wet or immerse it in water. In case it gets wet keep the phone OFF and do not try to use a microwave to dry it.
- This product should not be used in extremely hot, cold, dusty or humid spaces. It also should not be exposed to long periods of sunshine or strong magnetic fields.
- Avoid all heat sources, ovens or other appliances (including amplifiers) that produce heat or have hot surfaces.
- Excessive high-volume levels or noise may affect your hearing. To prevent this from happening use an adequate volume in your earphones when you are listening to music or enjoying any of the multimedia features of the phone.
- You are fully responsible for keeping your information backed up and we don't take any legal responsibility for data that is damaged or lost. It is possible to erase or interfere with the information stored in your phone by a magnetic device when using your phone. To avoid this from happening, keep your phone clear from magnetic devices.
- Pointing the torch into your own or another person's eyes will cause damage and may result in blindness.

Safety Recommendations while using your device

AIRCRAFT

Switch off your wireless device whenever you are instructed to do so by airport or airline staff.

If your device offers a 'flight mode' or similar feature consult airline staff as to its use in flight.

DRIVING

Full attention should always be given to driving and local laws and regulations restricting the use of wireless devices while driving must be observed.

HOSPITALS

Mobile phones should be switched off wherever you are requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

PETROL STATIONS

Obey all posted signs with respect to the use of wireless devices or other radio equipment in locations with flammable material and chemicals. Switch off your wireless device whenever you are instructed to do so by authorized staff.

INTERFERENCE

Care must be taken when using the phone near personal medical devices, such as pacemakers and hearing aids.

For Pacemakers

Pacemaker manufacturers recommend that a minimum separation of 15cm be maintained between a mobile phone and a pacemaker to avoid potential interference with the pacemaker. To achieve this, use the phone on the opposite ear to your pacemaker and do not carry it in a breast pocket.

For Hearing Aids:

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

For other Medical Devices: Please consult your physician/doctor and the device manufacturer to determine if operation of your phone may interfere with the operation of your medical device.

Safety recommendations for accessories

- Use only Opel Mobile accessories or chargers that came with this phone
- Be careful when handling the battery. The lithium-ion battery can be put into use immediately after being unpacked. Use only the Opel Mobile battery that came with the device. We recommend charging the battery as soon as possible once the phone has been switched on.
- Immediately stop using the battery charger if you smell an odour or overheats or a crack appears in the casing.
- In case you notice the cable, or the plug have suffered any damage, discontinue using it and contact sales support line as soon as possible for advice.
- The memory card should be protected from strong shocks and static electricity. Handle with care.

Usage conditions and restrictions

- All packaging materials, especially plastic ones, must be disposed of properly. The lack of this procedure may cause a suffocation danger to children. Any packaging must be kept out of children's reach.
- This device is not a toy and not designed for children and strict adult supervision must always be adhered to. Keep the phone and accessories beyond children's reach.

- This device can be recycled. To dispose of this device properly remember to follow local regulations. Local authorities may guide you on finding appropriate facilities to this end. The battery must never be disposed of in a fire.
- If this phone is lost or has been stolen please notify your network service provider as soon as possible and ask for the SIM card to be deactivated
- You are fully responsible for any damage caused by not following these instructions or for improper use of the device. We do not accept any liability for any improper use or mishandling on this device.

Quick Setup Guide

Installing the SIM card

This Phone requires a Standard Size SIM Card which is the largest of the 3 sim cards available. If you don't have a standard size sim card, please contact your sim card provider to receive a standard size sim card.

1. Remove the back Cover by lifting from the bottom left hand corner first then remove completely.

2. Remove the battery by lifting from the top first then pulling out.

3. Insert your standard size sim card, ensure the gold contacts are facing downwards and the cornered edge is in the top left-hand corner. Slide your sim card in place until it doesn't go in any further.

Installing T-FLASH memory card (Optional accessory not included)

The T-Flash card is used as additional phone storage. When you connect to a computer via a USB cable, you can copy Music, Picture or Photos.

1. Lift the T-FLASH card memory slot by sliding the silver plate to the right and lifting up carefully to ensure you don't bend or break it.

2. Insert the T-FLASH card making sure the gold contacts are facing downwards.

3. Then push the silver cover back down and slide to the left to lock it back into place.

Installing the battery

1. Insert the battery by aligning the gold battery contacts with the phones 3 gold pins. Slide into place and push down to insert the battery

Charging the Phone

1. To charge your phone, insert the power adaptor into the wall.
2. Then insert the Micro USB into the phones charging socket or insert into the charging cradles charging socket and insert the phone into the charging dock
3. Turn the power on from your walls power.
4. We recommend charging the battery for at least 4 hrs before your first use.

*Please note if your battery goes completely flat, you will need to charge it for at least 10 minutes before the phone will turn on again.

Turning the phone on and off

1. To turn the phone on, flip open the phone and hold down the RED end call/power button key for at least 3 seconds.
2. To turn the phone off, hold down the RED end call/power button for 3 seconds. Then click yes using the left selection key.

Turning the phone on for the first time

1. Choose your preferred Language, by scrolling up and down using the up/down arrow keys. Then using the left selection key choose which language you would prefer.
2. If your sim card is already installed it will automatically choose the correct date and time where you are currently located.

Keypad functions (Predictive text)

This phone uses predictive text to help you type in names and words quicker and easier. This function is available when adding new contacts and text messaging. (Please note this function is not available for searching contacts, the normal keypad function is available by tapping on each keypad number until you have the letter you want)

Typing Words

1. When typing in words or names using the keypad simply press the letter on the keypad you wish to select.
2. For Example - you want to type "hello"
3. Click on 4GHI, 3DEF, 5JKL, 5JKL ,6MNO once.
4. The word hello will appear. By simply pressing the "0" space key it will select the word that is highlighted.
5. There may be other words that match this selection. By pressing the Left  and Right  arrow keys you can scroll through the list of words available, once the word is highlighted you can press the "0" space key or press the left selection key.

Typing Numbers

1. To type in numbers simply press the # hash key until the selection of 123 numbers appears either in the top left-hand corner when typing messages or in the box located to the right when typing in new contacts.
2. Then using the keypad type in the numbers, you want to select.

Typing symbols

1. To type Symbols like a dot or comma. Click the Star key. This will bring up the menu to choose which symbol you wish to use. By using the Up/Down  arrow keys and the left  and right  arrow keys, you can scroll through the symbols available. Simply press the left selection key to choose the symbol you wish to use when highlighted.

If you don't wish to use the predictive text feature, you can simply press the hash key until it selects the normal keypad function which shows either ABC or abc. This will need to be done each time you wish to type a message.

To revert to using predictive text simply press the hash key until the symbol sABC or sabc appears.

Phonebook/Calls

Adding new contacts

1. Click on menu using the left selection key and scrolling through using the up/down arrow keys, select phonebook by pressing the left selection key on Phonebook.
2. (Alternatively, you can click on the right selection key to select names to open the phonebook contact lists)
3. Scroll up using the up/down arrow keys and select "Add new contact" using the left selection key.
4. Then select where you want to save this contact "SIM" or "Phone" by scrolling up or down using the up/down arrow keys, then selecting option using the left selection key.
5. Type in their name by using the keypad.
6. Then press the down key and type in their phone number using the keypad.
7. Then using the left selection key, click options then click Save.

Adding Photo Contacts

1. Click on menu using the left selection key and scrolling through using the up/down arrow keys, select phonebook by pressing the left selection key on Phonebook.
2. (Alternatively, you can click on the right selection key to select names to open the phonebook contact lists)
3. Scroll up using the up/down arrow key and select "Photo contact" using the left selection key.
4. Then select an Empty Photo contact by scrolling up or down using the up/down arrow keys, then using the left selection key click on edit.
5. Type in their name by using the keypad.
6. Then press the down arrow key and type in their phone number using the keypad.
7. Then press the down arrow key to caller picture. Using the left and right arrow keys. Select how you want to add a picture for this contact. By taking a photo using the camera or from an already saved photo from files.
8. Then click options using the left selection key on the option you wish to choose. Then either take a photo or choose the photo depending on which option you wish to choose.

9. Then using the up/down arrow keys scroll to caller ringtone. It is set as default. By using the left and right arrow keys you can select a different ringtone for that contact. Once you have chosen which ring tone. Click on options using the left selection key and click save.
10. Then using the left selection key, click options then click Save.

Making a phone call using the phonebook

1. Click on menu then click on phonebook using the left selection key. Or using the right selection key click on names
2. Using the up/down arrow keys scroll through your list of contacts
3. Once you have highlighted the contact you wish to call, click on the green answer key to dial that contact

Making a phone call using the photo contacts

1. Click on the down arrow key while in home screen mode
2. It will then display your 8 saved photo contacts.
3. Using the up/down arrow key you can scroll through your 8 contacts
4. Using the number keypad press the number of the person you wish to call.

Making a phone call using the M1/M2/M3 Speed dial keys

1. Using the Keypad hold down either M1/M2/M3 to dial the contact saved to that speed dial number

Making a phone call using the 2-9 Speed dial keys

1. Using the keypad, hold down on the speed dial number contact you wish to call
2. The phone will then ring that saved contact

Answering a phone call

1. To answer an incoming call while the phone is closed, Simply flip the phone open and the call will automatically be answered.
2. To answer an incoming call while the phone is open, simply press the green answer key to answer that call

Magnifier

1. Using the left selection key, select menu.
2. Then scroll through using the up/down arrow keys until you have highlighted magnifier.
3. Using the left Selection key, press ok on magnifier.
4. This will then open the camera function.
5. By pressing the up or down arrow keys you can zoom in and out on words, pictures, objects to see them more clearly.

FM Radio

1. Using the left selection key, Select menu.
2. Then scroll through using the up/down arrow keys until you have highlighted FM Radio
3. Then using the left selection key, press ok on FM Radio

Search and scroll through stations

1. Using the left and right arrow keys you can auto search stations. It will stop on a station when it finds one.
2. Using the up/down arrow keys will manual search for a station.

Adjust the volume

1. Using the volume keys located on the right hand side of the phone, you can adjust the volume up or down

Options Menu

1. By using the left selection key and clicking options, you will bring up the FM Radio options list.

Here you can:

Channel List – You can save a channel list by selecting options and selecting edit and typing in the channel name and frequency. You can save up to 30 channels.

Manual Input – You can manually input the frequency to search for that channel

Auto Search – By clicking select on this function, you can auto search and save all available channels.

Settings – Here you can adjust the FM Radio Settings. Background Play, Loud speaker on or off, Record format, Record storage and RDS settings.

Record – By selecting on record. It will record that station

File List – Here you can select and view recordings you have made.

Turning off the FM Radio

1. To turn off the FM Radio Simply press the M2 key to stop playing the FM Radio

Voice Memos

This menu option enables you to create voice tasks which the phone will remind you to complete a task or remind you to do a task you need to do.

1. Using the left selection key, select menu, then using the up/down arrow keys scroll through until you highlight Voice Memos
2. Using the left selection key, select ok on voice memos
3. Select new using the left selection key to create a voice memo reminder
4. Type in the subject of the voice reminder using the keypad
5. Then scroll down using the down arrow key to Reminders sound.
6. Then using the left selection key, click on record.
7. Using the keypad select number 2 to start recording, speak into the phone to create the voice memo.
8. Once complete, click the right selection key to stop the recording then click the left selection key to save the voice memo audio. Then click back using the right selection key
9. Scroll down using the down arrow key to select the remind date and time.
10. Using the keypad type in the date and time you want the reminder to start.
11. Then scroll down using the down arrow key to highlight repeat.
12. Using the left and right arrow keys – you can select, the reminder once, every day, custom days, weekly, monthly or yearly.
13. Using the up/down arrow key you can scroll down to sound loop – using the left and right arrow keys you can select 10 times, always, 1 time, 3 times or 5 times. This option will save how many times the voice memo will repeat itself.
14. Then using the up/down arrow keys, scroll down to reminder interval – using the left and right arrow keys you can select 5 minutes, 10 minutes, 1 minute or 3 minutes.
15. Once you have completed, select ok using the left selection key and click save using the left selection key.

Edit a Voice memo

1. To edit a voice memo, follow steps 1 and 2 above
2. Using the up/down arrow keys highlight the voice memo you want to edit.

3. Then using the left selection key click options.
4. You can then select view, add, edit, search, delete, delete all, delete overdue, delete all, jump to date, view uncompleted, send to calendar or save as a file.
5. Using the up/down arrow keys highlight the option you wish to select, then using the left selection key select which menu option.

View – Allows you to view the voice memo contents

Edit – Allows you to edit the voice memo. Follow the steps above in this menu option

Search – Search for a voice memo using the keypad

Delete – delete this voice memo by using the left selection key

Delete all – Delete all voice memos by using the left selection key

Delete overdue – Delete overdue voice memos by using the left selection key

Jump to date – type in the date using the keypad to go to a specific date of voice memos

View uncompleted – view any uncompleted voice memos

Send to calendar – Send the voice memo reminder to your calendar

Save as a file – save this voice memo in your files folder on your phone

Camera

1. Select menu using the left selection key.
2. Then using the up/down arrow keys scroll through until you have highlighted camera, then select ok using the left selection key
3. The camera function will then open.
4. To take a photo click on the up arrow key. It will then take about 3 seconds for that photo to automatically save.

Camera Settings/Options

1. While in camera mode, select options using the left selection key.
2. The options menu will then appear. By using the up/down arrow keys you can scroll through each option. To open one of these options, click the left selection key to open it.

Photos – Shows all your photos you have taken

Camera Settings – Click the left selection key to select ok to open the camera settings.

LED Highlight – By clicking the left and right arrow keys you can turn the LED highlight on or off

Troubleshooting and Support

If you are experiencing difficulties with your mobile phone, please go through the following troubleshoots:

The Mobile Phone will not power on

1. Ensure the battery is inserted correctly
2. Ensure you are pressing and holding the power button for 5 seconds. (Red end call key on the inside of the phone)
3. Ensure you have charged the phone for at least 10 minutes

The phone is asking for a password on start-up

1. The default password is 0000, you can change the password via steps outlined previously in security settings

The phone is asking for a PUK code

1. This means you have input the incorrect password 3 times or more. Contact your SIM Card provider to retrieve your PUK code to unlock your phone.

SIM card error or no SIM card

1. Ensure you have inserted the SIM card correctly and are using the correct size SIM card. Follow instructions previously stated for installing the SIM Card.
2. Your SIM card may be damaged or dirty, ensure you replace your SIM with your SIM Card provider if this error occurs.

Failure to connect to the network

1. Your network signal may be weak or out of range. Contact your SIM Card provider or try the phone in a different location to check your signal.
2. Your SIM card may be damaged, invalid or has no credit. Contact your SIM Card provider for support.

Failure to make an outgoing call

1. Ensure you have entered the correct phone number you wish to dial.
2. Ensure you have enough credit on your SIM Card account. Contact your provider for support.
3. Your signal strength may be weak. Check your signal strength and contact your SIM Card provider.

Cannot hear anyone on the call

1. Ensure your call volume is adjusted to your requirements. Using the volume keys on the right side of the phone.
2. Ensure you have enough signal strength

Cannot receive calls

1. Ensure your mobile phone is switched on.
2. You have enough signal strength to receive calls.
3. Ensure you have not enabled call barring. You can find this under settings.
4. Ensure you do not have the phone in flight mode. See above for flight mode instructions.
5. Ensure your SIM card is installed correctly.

The other party cannot hear you on the call

1. Ensure your hand or fingers are not covering the Microphone.
2. Ensure you are speaking directly into the microphone.
3. Ensure the other party has their volume turned up to their desired level.

Mobile Phone won't charge

1. Ensure the power plug is inserted in the wall socket correctly and the wall switch is turned on.
2. Ensure the wall power socket is working by testing another device or a separate power socket.
3. Ensure you have inserted the mini USB cord into the phone correctly.

4. Ensure there is no dirt or dust accumulated in the phones power socket.
5. Ensure you have left the phone on charge for at least 10 minutes as the battery may have run out of charge completely.

Mobile phone won't connect via Bluetooth

1. Ensure you have turned on and activated the Bluetooth setting. See previous/above instructions.
2. Ensure the other device has Bluetooth enabled.
3. Your Bluetooth device may be too far away from the other device to connect. Ensure you are within range of this device to connect.
4. Ensure you follow the Bluetooth instructions as stated previously above.
